

Product description

The product uses the theory of intelligent chip designing and time domain reflection measurement to realise the measurement of network length and determine the location of fault point. In the meantime, the product is featured with variable audio line scanning signal as far as 1km, which is adequate to satisfy all kinds of needs for conductor arrangement & line inspection. The product has such functions as measuring cable length, positioning fault point line, testing line voltage, determining short circuit line. As a result, the product is widely applied in such occasions as Telecommunications, network & Infrastructure cabling.

Features:

1. Design of intelligent circuit & line scanning
2. Professional and exquisite appearance
3. Pragmatic lighting flashlight
4. Convenient sensitivity & volume adjusting function
5. Auto power of function

Specifications:

- Line Scanning: ✓
- Line Testing: ✓
- Lighting Flashlight: ✓
- Adjustable Tone: ✓
- LED Display: ✓
- Headset Function: ✓
- Transmission Distance: $\geq 1\text{km}$
- Output Signal Level: 15Vp-p
- Energy Conservation Design: ✓
- Adjustable Sensitivity: ✓
- low-voltage Detect: ✓
- Power Supply: 3 * AA Batteries & 1 * 9v Battery (included)
- Package Size: 25.7 * 16.2 * 5cm / 10.1 * 6.4 * 2in
- Package Weight: 408g / 14.4oz

Package List:

- 1 * i-POOK PK65H Multi-purpose Wire Tracker
- 1 * PK23 Receiver
- 1 * Alligator Clip Fit Line
- 1 * Chinese Manual
