

VICTOR®

Wall Scanner VC518

Characteristics

The tool is a handheld wall scanner for quick detection of magnetic metals in wall, rooftop and floor, such as reinforcing steels, iron pipes, and nonmagnetic metals such as aluminum pipes, copper pipes, and nonmetal materials such as beams, PVC water pipes, as well as electrified objects such as live wires.

Function	Range & Details
Testable Materials	Ferrous metal and Non-ferrous metal
	Non-ferrous metal
	AC Live wires
	Water Pipe
Maximum scanning Depth	110mm
Ferrous Metals	110mm
Non-ferrous Metals (copper pipe)	110mm
Copper conductors (live)	50mm (with Voltage)
Wood	25mm
Automatic Power-Off	After mins
Operating Condition	
Temperature	-10 to 50 °C
Humidity	<75%
Attitude	<2000M
General Info:	
Power Supply	1.5V*3 AAA
Dimensions	185*85*33mm
Weight	Approx. 180g
