

# VICTOR®

## 3 Phase Indicator VC850A

### Features:

1. One Unit with two functions: Check the phase sequence and indicate the phase is open or not.
2. Safe and reliable: With alligator clips, easily involve the terminals of the control panel, guaranteeing reliability and safety.
3. Wide voltage test: It can check 200V to 480V AC three-phase voltage, high performance.
4. Easy to use: With LED light to show if the phase is open or not, supports buzzer indication.
5. Portable design: Small and light weight, with a carrying bag, convenient to carry

Basic Function / Feature	VICTOR 850A
Product feature	Contact way by LED and buzzer
Function	Check the state of open phase and phase sequence
Voltage range	200~600V
Measuring frequency range	20-400Hz
Test cable length	1m
Product dimension	98*58*23mm
Weight	132g
Batteries	Without the use of batteries
